The Maths Learning Centre assists students in first year mathematics and statistics units of study who do not have the mathematics background for those units. Students who come to the Centre must satisfy our eligibility criteria. These criteria are given below for your information.

Mathematics Learning Centre Eligibility Criteria

Students are eligible to attend the Mathematics Learning Centre if they satisfy one of the following eligibility criteria.

General eligibility criteria

- Students who do not have the assumed mathematical knowledge for their first year mathematics or statistics units of study;
- Students who have had a break from study including mature aged students;
- Students from overseas or interstate;
- Students whose studies have been interrupted or impeded by either illness or accident or some other cause;
- Students who have previously unsuccessfully attempted a first year unit of study.

Specific eligibility criteria for commencing students with HSC studies in mathematics in the year preceding university entry.

Units of study (such as MATH1001/1002) with an assumed knowledge of Mathematics Extension 1
Students are eligible if they did not study HSC Extension 1 Mathematics or their mark was less than 35 (out of 50) in HSC Mathematics Extension 1

Other units of study:
Students are eligible if they did not study HSC Mathematics or if their mark was less than 70 in HSC Mathematics.
