

# Contents

<b>1</b>	<b>Functions I</b>	<b>1</b>
1.1	Function, domain, range . . . . .	1
1.2	Elementary functions . . . . .	2
1.3	Sums, products and composites of functions . . . . .	4
1.3.1	Examples . . . . .	4
1.4	Derivatives of elementary functions . . . . .	6
1.5	Rules for differentiation . . . . .	6
1.5.1	Examples . . . . .	7
1.6	Exercises . . . . .	8
<b>2</b>	<b>Functions II</b>	<b>11</b>
2.1	The chain rule . . . . .	11
2.1.1	Examples . . . . .	11
2.2	Implicit differentiation . . . . .	12
2.2.1	Example . . . . .	13
2.3	Related rates . . . . .	13
2.3.1	Example . . . . .	13
2.4	Parametric equations . . . . .	14
2.4.1	Examples . . . . .	15
2.5	Exercises . . . . .	17
<b>3</b>	<b>Trigonometric identities</b>	<b>19</b>
3.1	Revision of basic facts . . . . .	19
3.2	Addition and subtraction laws . . . . .	21
3.3	Double angle formulas . . . . .	21
3.4	$t = \tan(\theta/2)$ substitution . . . . .	22
3.4.1	Example . . . . .	22

3.5	Sums of sine and cosine terms . . . . .	23
3.5.1	Examples . . . . .	23
3.6	Exercises . . . . .	24
<b>4</b>	<b>Mathematical induction</b>	<b>27</b>
4.1	The method . . . . .	27
4.2	Examples . . . . .	28
4.3	Exercises . . . . .	30
<b>5</b>	<b>Polynomials and rational functions</b>	<b>32</b>
5.1	Polynomials . . . . .	32
5.1.1	Division of polynomials . . . . .	33
5.1.2	The Remainder Theorem . . . . .	33
5.1.3	Finding roots of polynomial equations . . . . .	34
5.2	Rational functions . . . . .	34
5.2.1	Asymptotes . . . . .	35
5.2.2	Examples . . . . .	35
5.3	Exercises . . . . .	37
<b>6</b>	<b>Solving equations</b>	<b>39</b>
6.1	Polynomial equations . . . . .	39
6.1.1	Quadratics . . . . .	39
6.1.2	Cubic equations . . . . .	40
6.2	Trigonometric equations . . . . .	40
6.3	Solving Inequalities . . . . .	41
6.4	Absolute values . . . . .	44
6.5	Exercises . . . . .	46
<b>7</b>	<b>Integration techniques</b>	<b>49</b>
7.1	Substitution . . . . .	49
7.1.1	Substitution and definite integrals . . . . .	51
7.2	Integration of $\sin^2 x$ and $\cos^2 x$ . . . . .	52
7.3	Exercises . . . . .	53
<b>8</b>	<b>Inverse functions</b>	<b>56</b>
8.1	Which functions have inverses? . . . . .	57
8.2	Formulas for inverse functions . . . . .	58
8.3	Examples . . . . .	58

8.4	Graphs of inverse functions . . . . .	60
8.5	Inverse trigonometric functions . . . . .	61
8.5.1	The inverse sine function . . . . .	61
8.5.2	The inverse cosine function . . . . .	62
8.5.3	The inverse tangent function . . . . .	62
8.5.4	Derivatives of inverse trigonometric functions . . . . .	62
8.6	Exercises . . . . .	64
<b>9</b>	<b>Applications of calculus</b>	<b>66</b>
9.1	The differential equation $\frac{dN}{dt} = k(N - P)$ . . . . .	66
9.1.1	Newton's law of cooling and heating . . . . .	67
9.2	Simple harmonic motion . . . . .	68
9.3	Exercises . . . . .	70
<b>10</b>	<b>Counting and permutations</b>	<b>73</b>
10.1	Counting principles . . . . .	73
10.1.1	Example . . . . .	74
10.2	Permutations . . . . .	74
10.3	Choosing an ordered set . . . . .	75
10.3.1	Examples . . . . .	75
10.4	Exercises . . . . .	76
<b>11</b>	<b>Combinations and the Binomial Theorem</b>	<b>79</b>
11.1	Combinations . . . . .	79
11.1.1	Examples . . . . .	79
11.2	The Binomial Theorem . . . . .	80
11.2.1	Examples . . . . .	81
11.3	Exercises . . . . .	82
<b>12</b>	<b>Answers to exercises</b>	<b>85</b>
12.1	Functions I . . . . .	85
12.2	Functions II . . . . .	86
12.3	Trigonometric identities . . . . .	88
12.4	Mathematical induction . . . . .	89
12.5	Polynomials and rational functions . . . . .	91
12.6	Solving equations . . . . .	94
12.7	Integration techniques . . . . .	95
12.8	Inverse functions . . . . .	97

12.9 Applications of calculus . . . . .	99
12.10 Counting and permutations . . . . .	101
12.11 Combinations and the Binomial Theorem . . . . .	103
<b>A Some standard integrals</b>	<b>107</b>
<b>B The Greek alphabet</b>	<b>108</b>
