

Special AWM Discussion

Utah's student chapter of the Association for Women in Mathematics is pleased to announce the second lecture in a recently established lecture series. This series brings prominent female mathematicians from across the country to Utah to share their career experiences. This special talk will consist of an open discussion of career issues in mathematics. All are welcome to attend. Come with questions!

Dr. Moon Duchin is a professor in the mathematics department at Tufts University. As an undergraduate at Harvard University, she double-majored in mathematics and women's studies. She went on to graduate school at the University of Chicago, where she specialized in geometry and topology. At Tufts, she is one of the core faculty members of Tufts's Science, Technology, and Society program. Dr. Duchin was also a Mathematical Association of America Distinguished Lecturer in 2016, speaking on the mathematics of voting systems.
