This assignment is due by **9am Wednesday 23 March**, via Turnitin. A scanned copy of your answers must be upload in the Learning Management System (Blackboard) at [https://elearning.sydney.edu.au](https://elearning.sydney.edu.au). It should include

- your name and SID,
- your tutorial time, day, room and Tutor’s name.

Printed/typed solutions are acceptable. The School of Mathematics and Statistics encourages some collaboration between students when working on problems, but students must write up and submit their own version of the solutions.

This assignment is worth 2.5% of your final assessment for this course.

Your answers should be well written, neat, thoughtful, mathematically concise, and a pleasure to read. Please cite any resources used and show all working. Present your arguments clearly using words of explanation and diagrams where relevant. After all, mathematics is about communicating your ideas. This is a worthwhile skill which takes time and effort to master.
